

Edgenexus ADC Nutanix

Deployment Guide

The purpose of this guide is to help you install a high availability pair of Edgenexus Load balancers onto the **Nutanix AHV Hypervisor**.

The **Edgenexus ADC** is an advanced yet easy to use Load balancer/ ADC. As well as basic load balancing it offers many advanced features such as traffic management, Application firewalling and Global server load balancing. It is certified to run on the **Nutanix AHV Hypervisor**.

Get the Edgenexus ADC software <u>here</u>

User Guide for Edgenexus ADC <u>here</u>

Visit the Nutanix website <u>here</u>

Email us at: hello@edgenexus.io **Call us on:** 0808 1645876 / (866) 376-0175

	Select Image Select Location	
	Placement Method	
	 Use categories This option is recommended. It makes it easy for you to manage placement. It requires you set up image placement policies and categorize your images and 	
	ciusters to manage placement. If no valid policies are created, image will be placed anywhere on all registered clusters.	
	 Don't Use categories This option is good for smaller environments. The image will be placed anywhere on the selected set of clusters. 	
	Categories	
	Clusters will be selected based on categories and associated placement policies. Categories	
	AppFamily:Networking	
	Previous Save	
		Activate Windows Go to Settings to activate Windows.
