

EdgeWAF

Your AI-Powered Web Application Firewall

Next-generation security. Zero-touch simplicity. Built to stop threats before they start, wherever your apps live.

What is EdgeWAF?

Web security, without the drama.

EdgeWAF is a next-generation AI-driven Web Application Firewall built for modern applications. It learns threat behaviours, adapts in real time, and neutralises attacks before they hit your app. Whether you run in the cloud, on-prem, or somewhere in between, EdgeWAF delivers ironclad protection without the fuss.

Why Choose EdgeWAF?

- ✓ **AI Threat Detection**, learns patterns. Stops threats you haven't met yet.
- ✓ **Behaviour-Based Analysis** Catches zero-days before they catch you.
- ✓ **Automated Rule Updates** Always current. Always clever. No patch panic.
- ✓ **Low False Positives** Real protection, without false alarms.
- ✓ **Cloud + On-Prem Ready**, Azure, AWS, hybrid, it fits right in.
- ✓ **Simple UI** Security tools should be simple. Ours is.
- ✓ **Real-Time Dashboard** Instant threat insights at your fingertips.
- ✓ **Role-Based Access Control** Delegate wisely. Control tightly.

Still using a WAF that's stuck in the 2010s? It's time to evolve. EdgeWAF is lean, smart, and doesn't need a babysitter. Start protecting your applications the way you always wanted to, without the complexity.

"We deployed EdgeWAF in under an hour. It's like having a full-time security team, minus the overhead."
