

When Speed, Simplicity, and Support Matter

Because sometimes, the best solution is the one that just works.

“

By partnering with HPE, we're able to expand our business into smaller countries that wouldn't have otherwise been economically viable to address, and broaden our global reach to increase our business growth."

”

Greg Howett, CEO Edgenexus

The Challenge

Even enterprise giants need simple, scalable solutions. HPE runs one of the world's most advanced IT infrastructures, but even they hit a roadblock. When managing global partner access to software downloads and security updates, their traditional load balancer (a "big-brand" appliance) was causing more pain than performance.

The Solution

A flexible, feature-rich ADC that felt tailor-made.

HPE deployed Edgenexus EdgeADC in front of their global partner download infrastructure. It replaced their legacy load balancer and immediately made a difference in both capability and manageability.

The Results

- Simplified global app delivery for HPE partners
- Flexible load balancing across regions and environments
- Significant reduction in licensing and operational overhead
- Better, faster traffic control thanks to no-code flightPATH
- Enterprise-grade support that actually delivers

Why Edgenexus

Why They Chose Us:

- Buy what you need. Scale when you grow. No penalties.
- Seamless performance on ProLiant servers.
- Up and running in hours, not days.
- Hands-on help from a team that's seen it all.

Favourite Feature

"Edgenexus worked exactly the way we wanted it to. Flexible, scalable, and powerful, without being a pain to use."

flightPATH™ – Rewrite URLs, route traffic, or block threats, all from a beautiful GUI. No scripts. No sweat.
