

Rock Solid Load Balancing

How The Dudley Group NHS Foundation Trust built resilience across Azure zones with Edgenexus.

“Edgenexus has provided us with an absolutely rock solid Loadbalancer platform for many years now!

Christopher Bott, Solutions Architect,
The Dudley Group NHS Foundation Trust

The Challenge

When you're delivering essential healthcare services, downtime isn't just inconvenient, it's critical.

The Dudley Group NHS Foundation Trust needed a feature-rich load balancer that could keep up with their cloud-first, resilience-driven strategy in Microsoft Azure.

The Solution

The DGFT team deployed the Edgenexus HA Cloud Connector, a powerful feature that enables seamless high availability across multiple cloud zones.

Even better? They got early access to test and refine the setup. Tailored support included.

The Results

With Edgenexus in place, DGFT now enjoys:

- Peace of mind during planned maintenance or sudden failures.
- Service continuity even during an entire Azure zone outage.
- A future-proofed, scalable load balancing solution.

Why Edgenexus

Why They Chose Us:

- Proven reliability: They'd used Edgenexus before and it never let them down.
- Rapid deployment in Azure
- Hands-on support and responsive issue resolution.

Favourite Feature

“It just works and is very reliable.”

When your job is to keep healthcare systems running, the last thing you need is a flaky load balancer. Edgenexus delivers set-it-and-forget-it performance, every time.
